Dr. Max Arocha

1125 S University Dr Plantation FL 33324 | 954-432-7771 | Dentist@DrArocha.com

What would Invisalign consist of when I come to your Invisalign practice in Plantation?

Invisalign is an orthodontic procedure that allows dentists to straighten your teeth using a series of clear, removable, nearly invisible, plastic appliances called Invisalign aligners.

Is Invisalign a new orthodontic way to straighten teeth?

No! dentists have successfully used removable appliances for over fifteen years and have treated over eight million cases treated with Invisalign. With the application of 3-D computer technology and high degree of customization, Invisalign can be used to treat almost anyone who wants straighter teeth.

How does Invisalign treatment works?

You would meet with an Invisalign-trained dentist who takes orthodontic records including a digital scan of the teeth, and fills out an Invisalign treatment planning or online prescription form and sends all the digital information to Invisalign.

The doctor reviews and approves the rendering of his treatment plan (the 3-D movie). Invisalign company produces a series of clear, plastic aligners that correspond to the stages of tooth movement in the 3-D movie.

You would then wear each stage of Invisalign aligners for two weeks before switching to the next set in the series. Week by week, the patient's teeth are straightened millimeter by millimeter.

What are the primary benefits of Invisalign?

Invisalign is comfortable: There are no wires, metal or brackets

Invisalign is nearly invisible: You can straighten your teeth without anyone knowing.

Invisalign is removable: You can eat and drink what you want.

Invisalign provides for better oral hygiene: You can brush and floss normally to maintain healthy gums and teeth.

How can I benefit from Invisalign?

Experienced provider, like our Certified Invisalign Plantation dentist, can use Invisalign to treat the vast majority of people who want straighter teeth. According to the *Journal of the American Dental Association*, two-thirds to three-fourths of American adults have some sort of crooked teeth and could benefit from orthodontic treatment.

How long does treatment take?

Like traditional braces, the length of treatment depends on the complexity of the case. Treatment time typically is about the same as conventional braces which is about one year.

Can any dentist treat patients with Invisalign?

No. Dentists must attend and complete an Invisalign training & certification seminar to treat patients with Invisalign. Moreover, Invisalign company also makes available to doctors advanced training which our Invisalign dentist have completed to provide the service here in Plantation, FL.

Does insurance cover Invisalign?

Any Insurance policy that covers braces also covers Invisalign to the same extent.

In our Plantation office, we have available forms of Invisalign payment plans?

Yes! We offer in-office Invisalign payment plan financing through companies such as [Leading Club](#) or CareCredit® Payment plans are available starting from \$99 to \$124 per month and up.

How many people are in treatment with the Invisalign System?

More than 8 million patients worldwide have entered treatment with Invisalign.

Is Invisalign FDA approved?

Invisalign has FDA clearance as a Class II medical device.
